

DAB pump KDN OVERSIZE

STANDARDISED CENTRIFUGAL PUMPS

**CONDITIONING, IRRIGATION, WATER TRANSFER,
PRESSURIZATION, INDUSTRIAL APPLICATION**

Single-stage centrifugal pump body with axial suction port, radial discharge port and horizontal shaft components. The KDN pumps have dimensions and nominal performances according to EN 733 (10 bar) but are designed for 16 bar operation wherever the shaft seal type allows it.

The suction and discharge flanges are according to EN 7005 PN 10 or 16. All pumps are dynamically balanced according to ISO 1940 class 6.3 and impellers are hydraulically balanced. Pump and motor are mounted on a common baseplate in accordance with EN 23 661 in all-welded steel. Oversizes have profile base frames. Due to the pump design the complete bearing assembly including impeller and shaft seal can be dismantled without removing the pump body from the pipe system (back-pull-out design).

Asynchronous, closed and cooled with external ventilation, 2, 4 or 6 poles motors.

Electrical protection: in compliance with the EEC 89/336 ELECTROMAGNETIC COMPATIBILITY directive and subsequent amendments, EEC 73/23 LOW VOLTAGE directive and subsequent amendments and CEI 2-3 standards.

Flow: Max. 2200 m³/h.

Head: Max. 158 m.

Liquid temperature: from -25°C to +140°C.

Operating pressure: Max. 16 bar.

Motor construction: B3.

Protection level: IP 55.

Insulation class: F.

Supply voltage: Three-phase 230-400V 50 Hz up to 2.2 kW included 400V Δ 50 Hz over 2.2 Kw.

Special versions on request: other voltages and/or frequencies.
