

DL-SC3 Data Logging Software/Cables Data Sheet

Our Digital Products are capable of transmitting data to a computer via an RS-232 serial connection. DL-SC3 is a proprietary data logging software and cable bundle that was developed to view and chart real-time measurements as well as log data with date and time stamps for easy analysis in Microsoft Excel.

Features:

- Specifically for OS-4, OS-6, SM-4, SM-6, A-22, and UV-100.
- Log real-time measurements to a file with date & time stamps.
- Open saved log files for quick and easy review.
- Logged data is compatible with analysis software such as Microsoft Excel.
- Includes the DL-C3: RS-232 Communication Cable Bundle with custom RS-232 Serial Data Cable and USB-to-Serial Adapter for easy connection between the computer and the instrument.
- All software and drivers are included on a multipurpose 2 GB USB drive.
- Compatible with Windows XP and Windows 7.

Specifications:

The DL-C3: RS-232 Communication Cable Bundle includes all the cables required to transmit data from our digital instrument to a computer. The bundle includes a custom RS-232 Serial Data Cable and a USB-to-Serial Adapter. A multipurpose 2 GB USB drive includes all the required drivers as well as 3rd-party data logging software.
