

BOD Direct Plus

BOD Direct Plus is the next generation BOD measuring instrument that delivers accurate, automatic and direct control of wastewater samples. With a user friendly and large graphic display that helps you obtain a graphical representation of measured values, BOD Direct Plus delivers free individual programming of each of the samples. The inductive stirring system offers maintenance and wear free operation with automatic centering of stirring rods. With the automatic start function built in, there is no possibility of the pressure fluctuations related to the manometric measurement.
