

Lenn-CENT4510 / Lenn-CENT4520

CALGON CARBON CARTRIDGES

Calgon Carbon Cartridges remove hydrogen sulfide, iron, chlorine, chloramine, certain pesticides, petroleum products and sediment particles..

Cartridges are available in 2 sizes, it is a high quality bituminous granular activated carbon with catalytic properties.

Technical data and operational parameters:

Parameter	Lenn CENT4510	Lenn CENT4520
	Value	
Height, inch	10	20
Maximum outer diameter, inch	4,5	
Micron Rating (Nominal)		
Maximum capacity ¹	2 700 gal (10 000 L)	
Recommended filtration flow rate ²	2 Gpm (8 Lpm)	
Temperature of water, °C ³	+4...+43	

Materials of Construction:

- Filter material Centaur

¹ Actual capacity depends on the source water quality and may vary

² Do not exceed the recommended flow rate of filtration since it can lead to deterioration of treated water quality

³ Cartridge is intended for purification of cold water only

The abovementioned information and technical data are relevant for products produced in 2016.
