

FIELD SERVICE ENGINEER

REGION	HOURS	SALARY
Benelux	40 hours per week	€3,000– €5,500

Are you a hands-on engineer who enjoys solving complex technical challenges on-site? Do you want to work with advanced water treatment systems across a wide range of industries? Then this role at Lenntech could be your next step.

ABOUT LENNTECH

Lenntech is an international specialist in industrial water purification. We design, build, and install tailor-made water treatment systems for customers worldwide, including seawater desalination, wastewater reuse, and ultrapure water production. Every system is custom-engineered and technically advanced.

YOUR ROLE

As a Field Service Engineer, you are the technical expert on-site. You ensure installations perform optimally throughout their lifecycle. You work independently at customer locations while staying closely connected with our engineering and quality teams. You take ownership, solve problems before they escalate, and represent Lenntech professionally in the field.

WHAT YOU WILL DO

- Perform preventive and corrective maintenance on water treatment systems
- Troubleshoot mechanical, electrical, and control system issues
- Conduct diagnostics, testing, inspections, and calibrations
- Implement software updates and system upgrades
- Provide technical support remotely and on-site
- Prepare detailed service and maintenance reports
- Ensure compliance with safety regulations and customer standards
- Maintain a safe and professional working environment

WHAT MAKES THIS ROLE INTERESTING

- Work with customized, high-end water treatment technology
- Enjoy a high level of independence and responsibility
- Work in an international environment
- Have a direct impact on customer satisfaction and system performance
- Solve technical challenges that require practical problem-solving skills

WHAT WE'RE LOOKING FOR

- MBO degree in Electrical, Automation, or Mechanical Engineering, or equivalent experience
- Preferably a minimum 3 to 5 years of experience in service engineering or commissioning
- Strong troubleshooting skills in electrical, mechanical, and control systems
- Comfortable reading schematics and using diagnostic tools
- Customer-oriented and professional communication skills
- Fluent in Dutch and English; additional languages are an advantage
- VCA and NEN 3140 certification, or willingness to obtain these
- Willingness to travel when required

WHAT WE OFFER

- ✓ Competitive salary between €3,000 and €5,500, depending on education and experience
- ✓ 25 vacation days based on a 40-hour workweek
- ✓ 8% holiday allowance and a pension scheme
- ✓ Travel expense reimbursement
- ✓ Attractive overtime compensation scheme
- ✓ Training and professional development opportunities
- ✓ International, informal, and open working culture
- ✓ Flat organization with short communication lines
- ✓ Fully equipped service vehicle with professional tools and a laptop
