chemical compatibility are primary concerns.

Opaque Slim Line[®] Filter Housings Molded from rugged reinforced polypropylene, Opaque Slim Line[®] filter housings offer outstanding chemical compatibility and are ideal for use in a variety of low-flow applications. These applications include under-sink and countertop residential filtration, pre- and post-reverse osmosis filtration, recreational vehicle filtration, food service and humidifying systems.

Clear Slim Line[®] Filter Housings offer on-site examination of flow, performance, and cartridge life. They are also ideal for a variety of applications.

Manufactured of clear Styrene-Acrylonitrile (SAN), the sumps are annealed to relieve stress, adding clarity and strength.
