

PolyNet[®] Filter Cartridges

The Next Generation in Depth Filtration Technology

Featuring

- Advanced media configuration enhances flow while providing extended service life.
- Absolute rated from 0.5 to 70 μm to provide consistent filtration for a broad range of applications.
- All Polypropylene construction for process compatibility

PolyNet[®] Filter Cartridges

The Next Generation In Depth Filter Technology

PolyNet filter cartridges are CUNO'S latest advance in depth filtration technology. The all polypropylene filter is constructed using a patented design that utilizes flow enhancing filter media and an innovative flow pattern. The result is an absolute-rated filter with vastly superior on-stream life that provides more cost effective filtration than conventional melt-blown filter technologies. PolyNet filter cartridges - the new leader in filtration performance!*

The PolyNet Advantage

- Superior Service Life - as much as 4 times greater dirt holding capacity than competitive filters
- All polypropylene depth filter cartridges for broad chemical and temperature compatibility
- Ratings from 0.5 - 70 microns to suit a wide range of applications
- Absolute-Rated Performance for consistent filtration quality
- Exhibits superior particle retention under increasing differential pressure

PolyNet Filter Construction

CUNO designed the PolyNet cartridge to provide *significantly* superior service life while maintaining a consistent filtration efficiency. PolyNet filters achieve this through an innovative cartridge design that allows uniform distribution of fluid flow *and* contaminant throughout the entire depth of the cartridge. PolyNet filter construction combines a unique polypropylene media with fluid distribution netting to form multiple layers. Critically positioned media flow channels allow greater movement of fluid from layer to layer. Three distinct media sections, made from multiple media/netting layers, are combined to form the filter cartridge.

The outer and middle sections contain multiple layers of interleaved filter media and fluid distribution netting. Within each media layer a portion of the fluid travels through the media while the balance of the fluid is delivered directly to the next distribution layer through the flow channels. The fluid distribution netting provides longitudinal and latitudinal flow paths to evenly distribute fluid flow across the surface of each successive media layer.

* US Patent 6,391,200

PolyNet® Filter Cartridges

The Difference is Performance

Flow channels appear in the outer and middle sections of the filter matrix, as seen in the cartridge cut-away. The size, number, and location of the flow channels combined with the fluid distribution netting ensure that a uniform amount of contaminant is distributed to each layer within these two sections, while maintaining a consistent flow.

The number of media flow channels decrease from the outer to middle sections to ensure even contaminant loading throughout the entire filter matrix. Extensive laboratory testing has demonstrated that CUNO has developed the optimal filter cartridge design.

The inner section, supported by a rigid polypropylene core and equal to approximately one third of the filter's depth, contains no flow channels and is the final qualifying section ensuring absolute rated performance.

The even distribution of contaminated fluid throughout the depth of the cartridge is the key to PolyNet filters exceptionally long service life, low pressure drop, and increased cost effectiveness.

Cut-away of the PolyNet filter cartridge showing the three sections of media layers and core

The Result

Superior Filter Service Life

Extensive testing has demonstrated that competitive filters of equivalent removal ratings subjected to the same contaminant load plug more quickly than PolyNet filters. The result is significantly shorter service life, and unpredictable filtration efficiencies. PolyNet filters provide a service life improvement of **up to 3 times greater than competitive products!** (Graph 1)

Lower Pressure Drop

The unique design and construction of the PolyNet cartridge allow for significantly lower pressure drops compared to equivalently rated melt-blown depth filters. Based on published data, a PolyNet filter system with a given flow would use up to 75% fewer cartridges than Osmonics Selex, 68% fewer than Pall Profile, and 42% fewer than Filterite Nexis! To underscore the PolyNet filter cost benefit, use the example in Table 1 as a guideline.

Graph 1. - PolyNet filters deliver longer service life

Table 1. - Comparison of 5 Micron* Filters in a 110 GPM System

	PolyNet Filters	Pall Profile®	Filterite Nexis®	Osmonics Selex®
Flow (gpm) / 10" cartridge @ 1 psid	3.1	1.0	1.8	0.8
Number of filters for a 110 gpm flow rate	12 / 30" cartridges	37 / 30" cartridges	21 / 30" cartridges	43 / 30" cartridges
* Based on the manufacturers published rating.				

For the same initial cartridge differential pressure, a 110 gpm system using PolyNet filters require significantly fewer cartridges. This results in lower capital investment for the filter housing and fewer cartridges to purchase.

PolyNet[®] Filter Cartridges

The Confidence of Consistency

PolyNet filters utilize advanced design and construction to achieve a level of filtration consistency unattainable by competitive filters. Combined with an exceptionally long service life, the PolyNet filter's consistent performance, as illustrated by comparative Beta-Ratio vs. Differential Pressure (Graph 2), provides predictable results throughout the usable filter life. Filters A, B, and C show a degradation in the Beta-Ratio as psid increases. *These filters exhibit a pattern of either unloading previously held particles or a loss of filtration efficiency.* The result of this inconsistent performance is a reduction in finished product quality, product yield, and an increase in total filtration cost!

Graph 2. - Beta Ratios demonstrate the PolyNet filter's ability to perform consistently throughout its life

Absolute PolyNet

Consistent filtration performance, time after time, from start to finish - the goal of every filter user, the solution provided by PolyNet filters! Absolute removal ratings for PolyNet filters are determined using a filter performance test developed by CUNO to comply with the general procedures outlined in ASTM STP 975. CUNO defines absolute rating as the particle size (x) providing an initial Beta Ratio (B_x) = 1000. At this Beta Ratio, the removal efficiency is equal to 99.9%. PolyNet filter ratings are specified in Table 2.

Table 2. - PolyNet Filter Ratings

Your Benefit - Total Filtration Cost Reduction

The PolyNet filter's performance and superior life advantage allow direct cost savings by reducing the number of filters used. In addition, the resulting reduction in filter change-out frequency decreases direct labor and filter disposal costs. PolyNet filter cartridges - providing performance and value!

PolyNet® Filter Cartridges

PolyNet Filter Applications

PolyNet's unique patented construction provides benefits to customers in a wide range of end-use filtration applications. High quality filtration along with total filtration cost reductions are very attractive benefits to customers in diverse industries.

Chemical and Hydrocarbon Processing Applications - Cost reduction is the most critical issue in the production of high quality chemicals, petrochemicals, and in hydrocarbon processing. Using PolyNet filters in demanding applications that require absolute-rated performance provides long service life, the consistency demanded to attain quality standards, and a total Filtration Cost reduction! Applications include:

- Acids, bleach (sodium hypochlorite)
- Polyethylene and polypropylene manufacture
- Amine sweetening and waterflood

Food & Beverage Applications - Increased consumer emphasis on product quality, as well as increased government regulation, are driving today's food & beverage industry to ever-finer levels of filtration. PolyNet filter cartridges meet this challenge throughout their entire service life. Typical applications include:

- Bottled water particulate and turbidity reduction
- Reverse osmosis membrane and spray nozzle protection
- Diatomaceous earth or carbon fine trap
- Beverage blending, rinsing, or wash water

Fine Chemical and Electronics Applications - PolyNet filters with their unique filter matrix are ideally suited for electronics applications where heavy contaminant loading is present and efficient long lasting filtration is required. The combination of all-polypropylene construction and the unique media provide the perfect filtration device for use in wafer manufacturing and semiconductor device fabrication. Applications include:

- Pre-RO filtration of high silt density index incoming water
- Copper sulfate plating bath filtration in printed circuit board construction
- Color screen filtration for CRT production

Coating Applications - PolyNet filter cartridges are well suited for the filtration of high solid coatings where they provide superior life while selectively removing the large undesired particles from the coating and allowing the smaller desired particles to pass. PolyNet applications include:

- Film & paper coatings
- Photographic film
- Lens coatings & magnetic media
- Can coatings, high quality paints, & ink

Industrial Applications - PolyNet filter cartridges are ideal for higher dirt loads because of the unique flow characteristics and long service life that provide reduced overall filtration costs. PolyNet cartridges are used in a broad range of general industrial applications that include:

- Machine tool lubrication, chemicals, detergents, and waste water
- Textiles, plating baths
- Pulp & paper
- Process water & ground water remediation

CUNO Filter Housings

CUNO manufactures a wide range of filter housings. Housings that accommodate from a single filter element, to many hundreds, available in a broad choice of materials, and a flexibility of design ensure that CUNO has a filter housing to suit your needs.

ES Series Filter Housing - The ES Series filter housing is a durable high volume filter housing constructed from 316L stainless steel or carbon steel. With a cartridge capacity from 12 to 480 equivalent lengths, the ES filter can accommodate a wide range of flow requirements. For more information, ask your local CUNO distributor for brochure LITCHSES1.

CTG-Klean® Filter Housing - A unique design provides a totally enclosed system using separate pressure vessel and filter pack to isolate process fluid from the housing. This

system virtually eliminates the costs involved with filter change-out while protecting the environment and operator from exposure to the process fluid. For more information, ask your local CUNO distributor for brochure LITCCK001.

DC & SD Filter Housings - DC and SD filter housings offer a cost effective alternative for low volume filtration. Constructed from reliable 304L stainless steel (Model DC) or 316L stainless steel (Model SD), systems are available for a wide range of flow rates and applications. For more information, ask for literature LITHSDC1 and LITHSSD1.

PolyNet® Specifications

Materials of Construction*

Filter Media, Netting, Core, End Connector	Polypropylene
Gaskets & O-ring Options (see ordering guide)	Silicone, Fluorocarbon, EPDM, Nitrile, Teflon Encapsulated Viton, and Polyethylene

Operating Conditions

Maximum Operating Temperature	180° F (82°C)
Maximum Differential Pressure	50 psid at 86°F (3.4 bar at 30°C)
	30 psid at 131°F (2.0 bar at 55°C)
	15 psid at 180°F (1.0 bar at 82°C)
Recommended Change-Out Differential Pressure	35 psid at 86°F (2.4 bar at 30°C)

Cartridge Dimensions

Inside Diameter	1 3/32" nominal
Outside Diameter	2 1/2" nominal
Length	5, 9 3/4, 10, 19 1/2, 20, 29 1/4, 30, 39, and 40 inches

* All materials are FDA compliant per 21 CFR, Teflon and Viton are registered trademarks of E. I. du Pont de Nemours and Company.

Flow Rates

Flow vs. differential pressure in water is depicted for each PolyNet filter grade in the graph below. Detailed information for calculating flows for fluids with other viscosities is located in the following table. Use the formula in conjunction with the values from columns 3 or 4 in the table. The specific pressure drop values may be effectively used when three of the four variables (viscosity, flow, differential pressure, and cartridge grade) are set.

$$\frac{\Delta p}{\text{psi (mbar)}} = \frac{\left(\frac{\text{Total system}}{\text{gpm [lpm]}} \right) \left(\frac{\text{Viscosity in}}{\text{Cp}} \right) \left(\frac{\text{Value from}}{\text{table}} \right)}{\left(\frac{\text{Number of}}{\text{Equivalent Single Length Cartridges}} \right) \left(\frac{\text{in housing}}{\text{in housing}} \right)}$$

PolyNet Flow Rates			
Grade	Absolute Rating (µm)	Specific Pressure Drop per 10" Cartridge*	
		psid/gpm/cps	mbar/lpm/cps
T005	0.5	4.5	81.9
T010	1	2.5	45.5
T020	2	0.87	15.9
T030	3	0.44	8.0
T050	5	0.32	5.9
T100	10	0.14	2.5
T200	20	0.065	1.2
T300	30	0.05	0.91
T400	40	0.042	0.76
T500	50	0.029	0.52
T700	70	0.025	0.45

* Specific aqueous pressure drop at ambient temperature for a single length equivalent (10") cartridge. For multiple cartridge lengths, divide the total flow by the number of equivalent lengths. For liquids other than water, multiply the specific pressure drop value provided in the table by the viscosity in centipoise.

Chemical Compatibility

The 100% polypropylene construction provides excellent chemical compatibility in many demanding process fluid applications. Compatibility is influenced by process operating conditions: in critical applications, cartridges should be tested under actual conditions to ensure correct selection.

Scientific Application Support Services (SASS)

Dedicated technical support teams comprised of CUNO scientists and engineers are available to provide application specific recommendations for the most effective and economical filtration system. In addition to comprehensive testing and analysis conducted at CUNO's advanced laboratories, the SASS staff frequently performs on-site testing at customer's facilities. Contact your CUNO representative for additional information.

[†]Requires N end modification for use in CT101 (PN 44860) only

*Applies to D, N, and P end modifications only

** for use with 1ZMP housing

This PolyNet series filter is tested and certified by WQA against NSF/ANSI Standard 61 for material requirements only.*

*For O-ring "K" please consult factory.

Cold Water Only

Install this product in accordance with the instructions provided by the housing manufacturer. This product has a minimum flow rate requirement of 6.6 gallons per day (25L per day).

WARRANTY

Seller warrants its equipment against defects in workmanship and material for a period of 12 months from date of shipment from the factory under normal use and service and otherwise when such equipment is used in accordance with instructions furnished by Seller and for purposes disclosed in writing at the time of purchase, if any. Any unauthorized alteration or modification of the equipment by Buyer will void this warranty. Seller's liability under this warranty shall be limited to the replacement or repair, F.O.B. point of manufacture, of any defective equipment or part which, having been returned to the factory, transportation charges prepaid, has been inspected and determined by the Seller to be defective. THIS WARRANTY IS IN LIEU OF ANY OTHER WARRANTY, EITHER EXPRESSED OR IMPLIED, AS TO DESCRIPTION, QUALITY, MERCHANTABILITY, FITNESS FOR ANY PARTICULAR PURPOSE OR USE, OR ANY OTHER MATTER. Under no circumstances shall Seller be liable to Buyer or any third party for any loss of profits or other direct or indirect costs, expenses, losses or consequential damages arising out of or as a result of any defects in or failure of its products or any part or parts thereof or arising out of or as a result of parts or components incorporated in Seller's equipment but not supplied by the Seller.

Important Notice

CUNO MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Since a variety of factors can affect the use and performance of a CUNO product in a particular application, some of which are uniquely within the user's knowledge and control, user is responsible for determining whether or not the CUNO product is fit for a particular purpose and suitable for user's method of application.

Limitation of Remedies and Liability

If the CUNO product is proved to be defective, THE EXCLUSIVE REMEDY, AT CUNO'S OPTION, SHALL BE TO REFUND THE PURCHASE PRICE OR TO REPAIR OR REPLACE THE DEFECTIVE PRODUCT. CUNO shall not otherwise be liable for loss or damages, whether direct, indirect, special, incidental or consequential, regardless of the legal theory asserted, including, but not limited to, contract, negligence, warranty or strict liability.
