

RESEARCH & DEVELOPMENT INTERNSHIP

LOCATION
Delfgauw, The Netherlands

DURATION
6 to 12 months

COMPANY
Lenntech

Contribute to research projects that support innovative and sustainable water treatment technologies. You will work alongside engineers and technical specialists while gaining experience in laboratory research, pilot-scale testing, and technical analysis.

YOUR RESPONSIBILITIES

Laboratory research

- Conduct performance tests on membranes and emerging water treatment applications
- Support proof-of-concept studies and process optimization activities

Pilot-scale testing

- Monitor system performance and collect operational data
- Evaluate technical feasibility and identify opportunities for improvement

Research support

- Perform literature reviews and technical research
- Support ongoing R&D projects with testing, analysis, and reporting

WHO ARE YOU?

- MSc student in Engineering, Environmental Technology, Chemistry, or a related field
- Fluent in English
- Passionate about sustainability and environmental innovation
- Independent, analytical, and eager to learn
- Eligible to work in the Netherlands with an EU passport or valid work permit

WHAT WE OFFER

- ✓ Monthly internship allowance
- ✓ Accommodation provided by Lenntech for international students
- ✓ Hands-on research experience
- ✓ Opportunity to work on innovative water treatment projects
