

MAGNA CN8-F

STRONG ACID CATION

NON-SOLVENT
FINE MESH POLYSTYRENIC GEL
8% CROSSLINKED
SODIUM FORM

ResinTech CN8-F is a non-solvent dark brown or black colored fine mesh strong acid cation resin in sodium form made with an 8% cross-linked gel. It offers faster kinetics and improved regeneration efficiency compared to similar resins with larger beads. CN8-F is intended for industrial softening applications that have high levels of iron in the feedwater, where resin bed depth is less than ideal, and for applications that challenge the kinetic limits of larger size resins.

APPLICATIONS

- Softening - Industrial
